OBJECTIVE

To leverage my understanding of n8n JSON payloads, API configurations, and large-canvas data architectures as an n8n power-user in a **Technical Support, Product Testing, or Developer Relations** role.

SUMMARY

Active n8n Discourse community contributor and 'May Community Challenge Winner' featured on the global live stream. A self-taught WordPress builder turned n8n addict and "vibe coder" who bypasses traditional coding constraints to build enterprise-grade automation infrastructure.

Technical Skills & n8n Ecosystem Footprint

- **Vector DB & Embeddings:** Engineered whole-folder multimedia ingestion pipelines automating detailed metadata extraction and vector embeddings directly into **Supabase Vector DB**.
- **Multi-Canvas & Parallel Flows:** Architected complex web-hook driven tracks to bypass native sequential limitations, handling true **parallel executions** on single canvases. Flow – sub flow executions, with stats and error catch; to Whatsapp, Slack, email.
- **Speed & Node Testing:** Benchmark native http node performance vs AI agent and sequential handling LLM nodes. Engineered optimized single batch payloads. Real-world benchmark tests on LLMs performance of social media creation; YouTube video.
- **LangChain Agent Tooling:** Built full-scale **Voice AI architectures** with cloud hosted Web UI and Grok TTS, tied directly into a LangChain agent, creating custom tools and custom payloads for dynamic data querying.
- **MCP Protocol Integration:** Early adopter of **Model Context Protocol (MCP)**, connecting IDEs directly to n8n to give LLMs instant access to local canvas tools.
- **Infrastructure & Cloudflare:** Proficient in bare-metal **Self-Hosting**, Cloudflare R2 bucket routing, **Cloudflare Tunnels**, Workers, and Postgres database management.

Experience & Projects

Founder & Lead Tinkerer | *W57th Agency*

Jan 2026 – Present

- Endlessly in the toolshed with n8n—breaking, testing, and launching complex GenAI media and automation flows to streamline operations for executives and friends.
- Designed the "Fred Voice AI Engine" combining web/mobile voice interfaces with heavy background automation.

Automation Consultant | *Elite Architects AI*

Jan 2026 – Present

- Marketing strategy for human-real low latency voice automation; integrating vapi.ai, Retell, Go High Level / CRMs and human-in-the-loop n8n approval pipelines.

Production Apps & Live Deployments

- **fraink.app**, and pre-n8n: **battlecode.ai** | **fade.moe** | **loftcoin.net**
- Live testing environments demonstrating multi-modal AI setups, market alerting tools, web deployment pipelines, and interactive canvas logic.

Independent Claims Adjuster | *AIG / Churchill Claims*

2017 – 2026

- Managed high-net-worth commercial, liability, and property claims. High-stakes data verification, technical documentation, and immediate problem-solving under tight pressure.

Owner & Contractor | *Brushed Interiors (NYC)* | *2008 – 2017*

Proprietary Equities Trader | *Madison Trading / Bulldog Capital (NYC)* | *1999 – 2003*

Education & Certifications

- **AA Electronics & Electrical Theory** – Milwaukee Technical College (1991)
- **Microsoft Certified Product Specialist (MCPS)** – Windows NT 4.0
- **Licensing:** Active Insurance Adjuster Licenses (5 States) | NFIP FEMA Certified
- **Past Financial Licenses:** Series 7, 55, 63 Stock Broker Licenses
